

# Talha Eren YAPRAK

## Architect and Graphics Designer

İstanbul, Türkiye | Phone Number: +90 544 324 24 72 | E-mail: [contact@erenyaprak.com](mailto:contact@erenyaprak.com)

Portfolio: [www.Erenyaprak.com](http://www.Erenyaprak.com) | [www.linkedin.com/in/eren-yaprak/](https://www.linkedin.com/in/eren-yaprak/)

I'm an Istanbul-based graphic designer who has been working with various clients for the past two years. My Architecture education from the University of Bilkent enables me to apply my understanding of space and composition across everything from branding to digital experiences. My knowledge of workflow automation and coding allows me to optimize design processes and bridge the gap with development teams. I create UI/UX designs, brand identities, and responsive web interfaces using Figma and Penpot. I design mobile applications for IOS and Android, build prototypes with HTML/CSS, and create micro-interactions through motion graphics. Since I speak English, Turkish, and Russian, I communicate comfortably in international projects. I'm open to collaborations on projects that produce both aesthetic and functional solutions.

### Experience:

#### Freelance Designer and Architect

*June 2025 – Ongoing*

I lead UI/UX design, branding, and architectural visualization projects for clients across various industries. Using Figma and Adobe CC, I deliver user-centered and aesthetically compelling solutions.

Skills Used: Blender, HTML/CSS, Adobe CC, Figma

#### Graphic Designer, Bitexen

*April 2024 – May 2025*

I developed marketing materials, social media visuals, and digital advertising campaigns for Fintech companies Bitexen and Slayzapp which operate under Exenpay, while maintaining brand identity. Using Adobe CC, I established a consistent and effective visual communication language. I contributed to mobile interface design and email campaigns via Figma. By integrating Excel data with Adobe CC, I automated weekly content publishing. I also coded a team tool using Python/Selenium that automatically scrapes and prepares required data from the web.

Skills Used: Figma, Adobe CC, HTML/CSS, Python, Blender, Microsoft Office

#### Site Architect, Güryapı İnşaat

*August 2023 – January 2024*

I supervised the implementation of architectural projects during the site phase of the construction project and reported on completed work. I ensured the timely and proper progress of the project by interpreting technical drawings received from the central office in the field and resolving any application issues. I revised projects where necessary according to existing site conditions and prepared 3D production files.

Skills Used: Blender, Rhino3D, AutoCAD

## **Intern Architect, Hilmi Güner Mimarlık**

*August 2022 – September 2022*

I actively participated in the office's project drawing and revision processes. I created project drawings for public and commercial projects using AutoCAD.

Skills Used: Autocad

## **Education:**

### **Architecture Undergraduate Student (Erasmus), Politecnico di Milano**

*February 2022 – July 2022*

I took courses on advanced architectural design and theory at Politecnico di Milano, learning design approaches from different cultures. I broadened my perspective by working with an international team. I completed my Restoration and Energy Efficiency-Focused Design training here.

Skills Learned: Microsoft Office, Rhino3D, AutoCAD, Adobe CC

### **Architecture Undergraduate Student, University of Bilkent**

*September 2019 – July 2023*

I received comprehensive education on design principles, construction, space theory, and digital tools at University of Bilkent Department of Architecture. I developed critical thinking and problem-solving skills by developing projects at every scale.

*GPA: 3.34/4.00*

Skills Learned: Adobe CC, Python, Blender, AutoCAD, Rhino3D, Grasshopper, Poster Printing and Press Oriented Design

## **Skills:**

**Language Skills:** Turkish (native), English (C1 - IELTS certificate), Russian (B1)

**Programs and Technology:** Figma, Illustrator, Photoshop, After Effects, Lottie Animation, HTML/CSS, Python, Premiere, Rhino3D, Grasshopper, Microsoft Office, AutoCAD, Blender, Artificial Intelligence / LLM integration

**Professional Capabilities:** UI/UX Design, Brand Identity, Web Design, Mobile Design, Motion Graphics, 3D Modeling, Print Oriented Design and Printed Promotionals, Plan and Project Drawing
